ABSTRACT

Textual information, 32 tables, and 12 figures are used to describe Alaska high school seniors in this 12th annual survey report. During the fall of the 1988-89 school year, 3,254 seniors attending Alaska public and private high schools responded to the questionnaire sent to a total of 5,910 students for a return rate of 55.1 percent. The questionnaire covered demographic characteristics (sex, race, primary home language, income, etc.); a description of the high school experiences of the student (evaluation of school experiences and identification of possible areas of weakness); a description of the educational experiences of the student in specific target disciplines (foreign languages and computers); the postsecondary plans of the respondent (occupational choices, choice of college, and comparison between seniors planning and seniors not planning postsecondary education); and more detailed representation of those respondents planning to pursue postsecondary education (state of attendance, Alaska attendance, reasons for institutional choice, familiarity with financial aid, and plans to return to Alaska). Appendices contain a copy of the survey form and data tables. (JDD)

INTRODUCTION

Over the past several years, large numbers of Alaska's high school seniors have looked "outside" for pursuit of postsecondary education. In an effort to document this pattern and to try to understand the underlying motivations, this annual survey of Alaska's seniors has developed. The first survey report was published for the 1977-78 academic year; this report represents the twelfth in the series.

During the fall of the 1988-89 school year, Alaska high school seniors were asked their opinions of their overall high school experience, their need for additional assistance in selected academic and career planning areas, and general demographic information, as well as what they planned to do after high school graduation. Survey results can be used for administrative and academic planning within the State and for improving student counseling and advisement.

Also, questions were included to obtain information on disciplines which had been targeted for statewide examination by the State Department of Education. For 1988-89, the target disciplines were foreign languages and computers.

11

-1-

METHODOLOGY

A written questionnaire, consisting of twenty questions, was sent to all 211 Alaska public and private schools identified as having seniors in attendance.

For 1988-89, it was estimated that there were 5,910 students who graduated from the twelfth grade in Alaska. Of these 5,910 seniors, 3,254, or 55.1 percent, responded to this survey. Forty percent were seniors enrolled in Anchorage area schools. Students from Fairbanks accounted for 7.9 percent, Kenai/Soldotra for 12.7 percent, Ketchikan for 3.6 percent, Juneau for 4.1 percent, and the remainder of the students in the State accounted for 31.7 percent.

Five general groupings of question were included in the questionnaire. These included:

- 1. the demographic characteristics of the student (sex, race, primary home language, income, etc.);
- a description of the high school experiences of the student (evaluation of school experiences, and identification of possible areas of weakness);
- a description of the educational experiences of the student in specific target disciplines (foreign languages and computers);
- 4. the postsecondary plans of the respondent (occupational choices, choice of college, post high school plans, etc.); and
- 5. a more detailed representation of the plans of the group of respondents planning to pursue some type of postsecondary education.

-2- 12

RESULTS AND ANALYSIS

A. DEMOGRAPHIC DATA

The demographic data indicate that the students who responded are a representative sample of the general senior population. This conclusion is based upon previous senior surveys and current year estimates and projections. Approximately half the respondents were male (51 percent) and half were female (49 percent); 71 percent were Caucasian, 16 percent were Alaska Native, 3 percent were Black, 3 percent were Oriental, and small percentages were Hispanic or other; 90 percent indicated annual family incomes of \$15,000 or more; 77 percent indicated annual family incomes of \$25,000 or more; and 94 percent were from homes where English is the primary language spoken. (Details of these results are presented in Appendix B, Tables 24 to 32).

B. HIGH SCHOOL EXPERIENCE

Ranking of High School Experiences. Respondents were requested to evaluate various aspects of their high school experiences using the following descriptors: outstanding, average, poor, or not provided. Those characteristics receiving the highest number of "outstanding" responses were: Athletic and Recreational Facilities; Counseling and Guidance Services; Library and Yocational Training; and Quality of Instruction, as indicated in Table 1. With the exception of the 1986-87 year, these responses are consistent with the opinions of seniors who participated in the survey over the past several years. Those characteristics receiving the least number of "outstanding" ratings in 1988-89 were:

13

-3-

Laboratory Facilities; School Rules, Regulations and Discipline; and Grades, Marks, Promotion Policies. It appears that the 1986-87 year's responses were an anomaly. This year's responses are consistent with the historical attitudes of seniors since the survey began as shown in Table 2.

TABLE 1
DISTRIBUTION OF "OUTSTANDING" RESPONSES
FOR HIGH SCHOOL CHARACTERISTICS

	"OUTSTANDING	" RESPONSES
CHARACTERISTICS	Number	Percent
Athletic & Recreation Facilities	1,013	32.3
Counseling and Guidance Services	939	30.2
Library, Learning Center Facilities	85 6	27.1
Quality of Instruction	776	24.2
Vocational Training	753	25.5
Special Help for Students	695	24.5
Variety of Courses	696	22.0
Grades, Marks, Promotion Policy	495	15.6
School Rules, Regulations, &		
Discipline	459	14.6
Laboratory Facilities	449	14.9
Overall High School Experience	803	25.3

TABLE 2
ALASKA HIGH SCHOOL SENIORS RATING THEIR OVERALL HIGH SCHOOL EXPERIENCE AS "OUTSTANDING"

Year_	Percent
1977-78	25.8
1977-78 1 9 78 - 79	33.8
1979 - 80	30.5
1980-81	25.1
1 981- 82	31.3
1 9 82 - 83	30.4
1983 - 84	28.4
1 984- 85	27.1
1985-86	28.1
1 9 86 - 87	15.1
1937-88	26.3
1988-89	25.3

Table 3 contains the "poor" response summary of the 1988-89 seniors. Those characteristics receiving the fewest "poor" ratings were: Quality of Instruction; Grades, Marks and Promotion Policy; and Vocational Training. The characteristics of School Rules, Regulations, and Discipline; Laboratory Facilities; and Counseling and Guidance Services were the most heavily criticized.

It is again promising to observe that the percentage of seniors who rated their overall high school experience as "poor" remained at 9.9 percent after reaching a disturbingly high disapproval rate of 22.7 percent in the 1986-87 year, which was by far the highest since the survey was initiated. This year's result is reflective of the historical trend which suggests that there exists a core of just under 10 percent of seniors who are dissatisfied with their high school experience.

The satisfaction rate this year, as measured by those seniors rating their high school experience as "average" or "outstanding", and shown in Figure 1 climbed to 90 percent. This continues a positive trend which began in 1982-83. Except for a 1986-87 anomaly, seniors seem to be satisfied with their high school experience.

DISTRIBUTION OF "POOR" RESPONSES
FOR HIGH SCHOOL CHARACTERISTICS

	"P00R" R	
CHARACTERISTICS	Number	Percent
School Rules, Regulations, & Discipline Laboratory Facilities Counseling and Guidance Services Variety of Courses Special Help for Students Athletic & Recreation Facilities Library, Learning Center Facilities Vocational Training	862 696 604 474 433 423 411 360 202	26.9 21.7 18.9 14.8 13.6 13.2 12.8 11.3 6.3
Grades, Marks, Promotion Policy Quality of Instruction	179	5.6
Overall High School Experience	317	9.9

Further analysis of seniors' evaluation of their high school experiences was conducted by comparing the assessment of respondents from small and large schools. Small schools were identified as schools with 250 students or fewer; large schools had more than 250 students. Table 4 shows the percentages of "outstanding" responses for small and large schools. In several areas, seniors from large schools differed in their opinions with those from small schools. In particular, there were considerable differences in the categories of Variety of Courses; Library, Learning Center Facilities; and School Rules, Regulations and Discipline.

Not too surprisingly, the seniors from large schools rate their Variety of Courses higher than seniors from small schools. This also holds true for their Library and Learning Center Facilities. However, the other facility characteristics (Athletic and Laboratory) for small schools, seem to be converging with their large school counterparts. In the area of School Rules and Regulations, it is the small schools with the higher marks. More seniors from small schools, over large schools, rate this school characteristic as "outstanding." It is encouraging to note that students from small schools, for the fourth year in a row, highly rate Quality of Instruction. Some reasons which have been suggested for this encouraging statistic are (1) the smaller schools, most of which have only been in existence for a few years, are maturing, (2) there has been an increased emphasis on curriculum development; and (3) more students are graduating than in previous years.

TABLE 4

PERCENTAGES OF "OUTSTANDING" RESPONSES FOR
HIGH SCHOOL CHARACTERISTICS FOR LARGE AND SMALL SCHOOLS

	PERCENTAGE OF "OUTSTANDING" RESPONSES				
CHARACTERISTICS	Large School	Small School			
Athletic & Recreation Facilities Counseling and Guidance Services Library, Learning Center Facilities Vocational Training Quality of Instruction Variety of Courses Special Help for Students Grades, Marks, Promotion Policy Laboratory Facilities School Rules, Regulations, & Discipline	32.6 30.0 29.3 24.8 24.3 24.2 22.3 15.2 14.8	27.3 26.5 15.8 18.4 23.8 11.0 19.4 16.8 10.5			
Overall High School Experience	26.0	24.9			

Target Disciplines. Seniors were asked to evaluate their general knowledge and ability to express themselves in special subject matter areas within foreign languages and computers. The descriptors used were: oustanding, average, poor, or not provided. As can be seen in Table 5, the seniors generally felt satisfied with their experiences in computers but almost one in three rated their education in foreign language as "poor" and 17.1 percent said the discipline was not offered at their school.

TABLE 5
DISTRIBUTION OF RATINGS OF GENERAL KNOWLEDGE
AND ABILITY TO EXPRESS ONESELF IN
LANGUAGE ARTS AND FINE ARTS

General Knowledge and	Foreign	Language	Computers			
Ability to Express	Number	Percent	Number	Percent		
Outstanding Average Poor	507 1,182 926	16.1 37.5 29.3	620 1,571 664	19.6 49.7 21.0		
Total	2,515	82.9	2,855	90.2		
Not Provided at School	541	17.1	309	9.8		
Total	3,156	100.0	3,164	100.0		

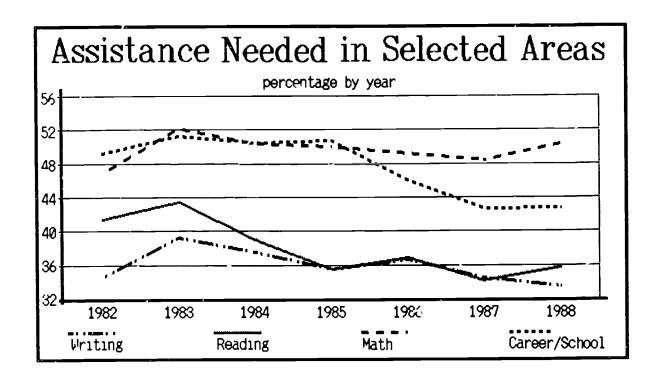

Areas of Improvement. Seniors were asked if they felt a need for additional assistance in the four areas of writing, reading, mathematics, and career planning. Table 6 shows that half of the seniors felt a need for more assistance in mathematics, about two in five seniors felt a need for help in career planning and approximately one in three seniors indicated a need for assistance in the areas of writing and reading. This year's responses appear to continue a general downward trend of seniors expressing a need for additional assistance in reading, writing, and career planning, but a continuation of a need for assistance in mathematics as illustrated in Figure 2. Not too surprisingly, the trend lines for writing assistance and reading assistance seem to track quite closely.

TABLE 6
SENIOR EXPRESSED NEED FOR FURTHER
ASSISTANCE IN SELECTED AREAS

	NE	DED	NOT NI	<u></u>	
TYPE OF ASSISTANCE	No.	%	No.	%	TOTAL
Expressing ideas in writing Improving reading skills Improving math skills Deciding on Career/Education	1,061 1,128 1,596 1,354	33.5 35.7 50.3 42.8	2,103 2,035 1,579 1,810	66.5 64.3 49.7 57.2	3,164 3,163 3,175 3,164

With the exception of career planning, there is not a great deal of difference between those seniors planning to attend a postsecondary educational institution (technical, business, 2-year or 4-year college) after high school and those planning to work full-time or those who were undecided about post-graduation plans regarding the need for additional assistance. These data, presented in Table 7, also reflect the opinion that the greatest need for those seniors planning to work continues to be for additional assistance in math skills and career planning. Indeed, the percentage of those seniors needing additional assistance in career planning has been 50 percent or higher since 1982. For those seniors planning education beyond high school, the greatest need areas were for improved math skills and additional assistance in career and/or educational planning.

TABLE 7
SENIOR EXPRESSED NEED FOR FURTHER ASSISTANCE IN SELECTED AREAS BY INDICATED POST HIGH SCHOOL PLANS

As a general rule, as a student's yearly household income increased, the need for assistance in all areas decreased. More than half of those seniors whose annual yearly household income was less than \$40,000 indicated that they needed assistance in improving math skills. These data are presented in Table 8. It should be noted, however, that the need for help in improving math skills and deciding on future career or educational plans is evident for a significant percentage of students, regardless of family income. More detail on need for assistance by varied levels of annual household income is presented in Appendix B, Table 30.

-11- 21

C. POSTSECONDARY PLANS

A number of questions regarding postsecondary plans were posed to the seniors, and based upon the responses, the seniors were divided into two groups, those planning educational pursuits and those not. Those planning some form of education were then asked to respond to additional questions which will be discussed later in this report.

The responses to the question concerning the post high school plans of seniors are contained in Table 9. The percentage of those planning to continue with some form of postsecondary education has been increasing for several years. In 1980, 56.5 percent of the seniors indicated that they wished to continue their formal education. Last year the percentage was 68.3 and this year it increased to 69.9 percent; Figure 3 shows that more than two out of every three seniors intend to pursue some type of postsecondary education.

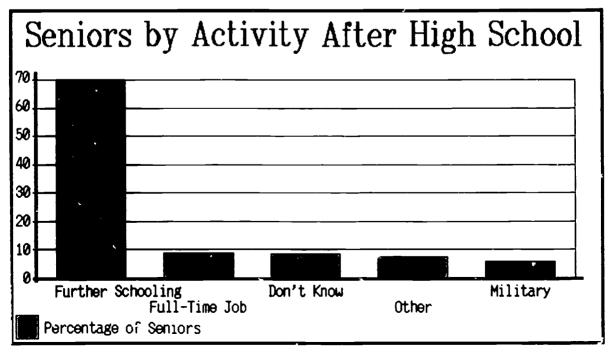

TABLE 9
DISTRIBUTION OF SENIORS BY
MOST LIKELY ACTIVITY AFTER HIGH SCHOOL

ACTIVITY	NUMBER	PERCENT
Attend a 4-Year College Attend a 2-Year College Attend a Vocational/Technical School Enter Into Apprentice Training Become a Full-Time Homemaker Join the Military Get a Full-Time Job Don't Know Yet Other	1,687 324 232 33 14 178 278 267 192	52.6 10.1 7.2 1.0 0.4 5.6 8.7 8.3 6.0
Total	3,205	100.0

The number of seniors not planning any postsecondary education was 962, or 30.0 percent of the total respondents. However, it should be noted that this number includes 267 students who did not know what they were going to do, so the number of students actually involved in postsecondary education could be higher.

FIGURE 3

D. COMPARISON BETWEEN THOSE SENIORS PLANNING POSTSECONDARY EDUCATION AND THOSE WHO ARE NOT

Sex. In examining the plans of the seniors and differentiating by sex, as presented in Table 10, one can see that certain activities are more likely for one sex than the other. For instance, approximately 74 percent of female seniors intend to enroll in some form of postsecondary education, while 65.8 percent of male seniors have the same intention. When focusing upon 2-year or 4-year postsecondary institutions, 68.5 percent of female seniors intend to enroll in either a 2-year or 4-year college, while 57.2 percent of the male seniors express the same desire.

TABLE 10
DISTRIBUTION OF SENIORS BY MOST LIKELY
ACTIVITY AFTER HIGH SCHOOL AND BY SEX OF RESPONDENT

	M/	ALE	FEN	1ALE
ACTIVITY	No.		No.	7,
Attend a 4-Year College Attend a 2-Year College Attend a Vocational/Technical School	763 161 139	47.2 10.0 8.6	919 163 93	58.2 10.3 5.9
Subtotal	1,063	65.8	1,039	74.4
Enter Into Apprentice Training Become a Full-Time Homemaker Join the Military Get a Full-Time Job Don't Know Yet Other	19 6 149 147 139 92	1.2 0.4 9.2 9.1 8.6 5.7	14 8 29 129 127 98	0.9 0.5 1.8 8.2 8.0 6.2
Subtotal	552	34.2	405	25.6
Total	1,615	100.00	1,580	100.0

Race. The race of the senior respondents was a significant factor in determining postsecondary plans. As illustrated in Table 11, 56.0 percent of Alaska Natives intend to pursue some type of postsecondary education, while 81.9 percent and 73.4 percent of Black and Caucasian seniors respectively indicated the same desire. The percentage of Alaska Natives intending to pursue some type of postsecondary education has fluctuated during the past several years. The percentage intending to continue their education has risen and fallen a few percentage points since 1982, when it was 42 percent, to this year's percentage of 56 percent. This is the highest level thus far and continues what appears to be a steady increase.

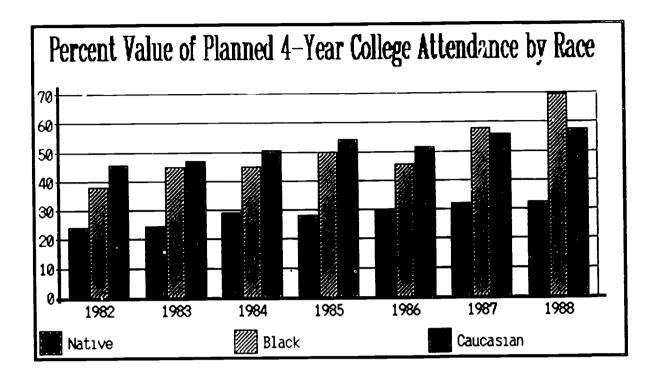

Native seniors, however, continue to have a much higher percentage of undecided responses than any other group. As Figure 4 illustrates, during the past several years, there has been a general increase in the percentage of seniors planning to attend a 4-year college or university, irrespective of race.

FIGURE 4

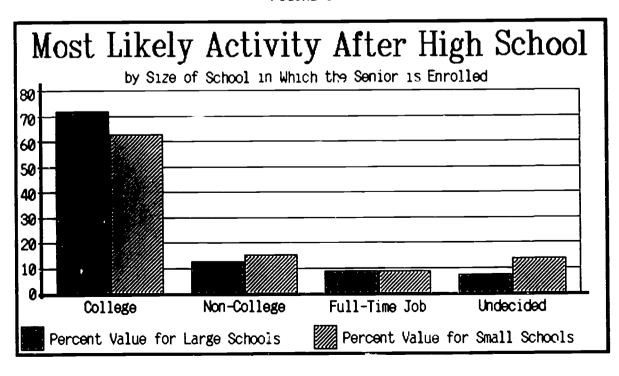

School Size. As illustrated in Table 12, and Figure 5, there continues to be a difference between those seniors planning to continue their formal education beyond high school and those seniors undecided about their future when differentiating by size of school they attend. Approximately seventytwo percent of the seniors from large schools intend to enroll in a postsecondary institution, while 62.6 percent of the seniors from small schools plan to continue their formal scnooling; and while only 7.1 percent of the large school seniors were undecided about their future plans, 13.7 percent of the small school seniors reported they remain undecided.

FIGURE 5

Household Income. In unal household income continues to relate strongly to specific postsecondary plans of the seniors, as it has over the past several years. A comparison was made of the responses of those seriors from households with annual incomes of less than \$25,000, \$25,000 to \$40,000, and more than \$40,000. The results of this comparison are presented in Table 13. As household income increases, so does the tendency of seniors to pursue postsecondary activities at a 4-year college. This, however, does not hold true for attendance at 2-year colleges or vocational/technical schools. In fact, the higher the household income, the less likely it is for seniors to attend vocational/technical schools. Also, as household income increases, uncertainty about postsecondary plans seems to decrease. Nearly fourteen percent of those seniors whose household incomes were less than \$25,000 indicated that they did not know what they intended to do after graduation, while only 5.1 percent of those students from households of income over \$40,000 expressed the same uncertainty.

Grades Earned. The seniors were asked to indicate what their grades had been in high school, whether they had earned mostly A's, mostly B's, mostly C's, or mostly grades below C.

As one might suspect, and consistent with surveys from the past five years, those seniors who earned mostly A's indicated their intention to pursue postsecondary education far more frequently than those earning lower grades. As Table 14, on the next page indicates, 79.4 percent of those seniors earning mostly A's, planned to attend a 4-year college, while considerably smaller percentages were reported by seniors with lower grades. Also, almost one of seven seniors whose grades were mostly below C do not know what they intend to do after high school, while less chan one of twenty-five of "A" students are undecided about the future.

Occupational Choice. Seniors were asked to choose a first and second occupational preference from a list of 58 technical and professional occupations. Business Management, Education, and Social Sciences are solidly the most popular choices by the seniors. It is important to recognize, however, that Computer Programming, once a popular choice, was not included at all in the top choices of seniors during the past years, and is not included again this year. The top four choices in descending order of popularity, were:

First Preference

Business Management Education Social Sciences

Second Preference

Business Management Law Social Sciences Education

The occupational preferences varied between the sexes, however, both business management and law were the top choices of both male and female seniors. The top four choices, in descending order of popularity, for male and female seniors were:

Male Seniors

Business Management Law Aviation Community and Social Services

Female Seniors

Education
Business Management
Social Sciences
Accounting

A further analysis was conducted to relate occupational preference to race of respondent. As in the past, it is difficult to discern particular patterns of occupational preference based upon race. However, the top choice for Black, Hispanic, and Oriental students was Business Management. The top choices, in descending order, for Alaska Native and Caucasian seniors were:

Alaska Native

Business Management Education Aviation Accounting

Caucasian

Business Management Education Social Sciences Law

E. SENIORS PLANNING POSTSECONDARY EDUCATION

A separate portion of the survey was devoted to obtaining more information about those seniors planning to pursue postsecondary education. Although the number of seniors indicating plans to attend school immediately after graduation was 2,243 in response to a number of cross-check items (such as sex, race, and high school size), the total number of seniors responding to specific questions on schooling increased to over 2,900. This increased figure is assumed to include not only those seniors with firm post high school plans, but also a number who were undecided and were responding in a suppositional manner. That is, suppose I were to attend, then how would I answer?

State of Attendance. Seniors were asked to indicate the state in which they planned to pursue their postsecondary education. The trend that Alaska is increasingly becoming a less popular choice appears to have

-24- 35

reversed. Figure 6 shows the rise, fall, and subsequent increase of seniors planning to reside in Alaska for postsecondary attendance.

FIGURE 6

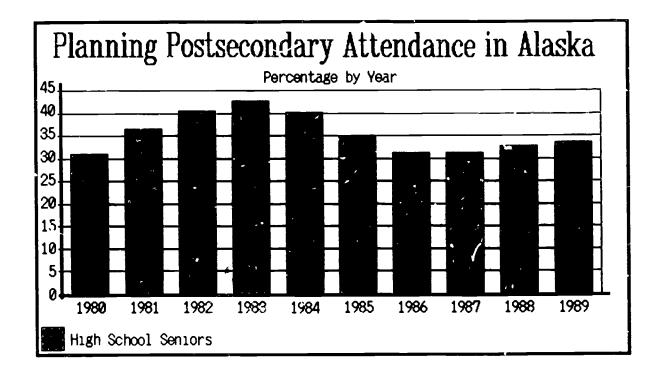

Table 15 provides detailed information regarding where the students intend to pursue their postsecondary education activities and shows that 33.6 percent of the seniors from this survey intend to stay in the State to attend a postsecondary institution, which indicates a slight upward trend. As in previous years, California, Washington and Oregon are the most popular states for those seniors who intend to enroll in institutions out-of-state. Figure 7 shows proportionately the 1988-89 choice for intended state of postsecondary actendance.

Total	2,917	100.0

^{*}Including foreign countries

FIGURE 7

When the intended state of attendance was cross-referenced with the seniors' grades in high school, no single state seemed to draw heavily from any particular grade group. The distribution for a few selected states is presented on a percentage basis in Table 16. It appears that those seniors electing attendance in Alaska are heavily represented by those earning mostly B's while in high school, but this distribution is probably due to the normal distribution of all seniors (also presented in Table 16).

TABLE 16

PERCENTAGE DISTRIBUTION OF SENIORS BY SELECTED

STATES OF PLANNED ATTENDANCE AND BY GRADES EARNED IN HIGH SCHOOL

SENIORS' GRADES	ALASKA	WASHINGTON	OREGON	CALIFORNIA	ARIZONA	ALL SENIORS

Total	100.0	100.0	100.0	100.0	100.0	100.0

Another way of examining these same data is to compare Alaska's drawing power, within the grade distribution of seniors, to the drawing power of "outside." This is presented in Table 17 and differs from Table 16 in that the question addressed in Table 17 is: of those seniors earning mostly A's (or B's, C's, etc.), how many plan schooling in Alaska; while the question in Table 16 is: of those seniors planning schooling in Alaska, how many earned mostly A's (or B's, C's, etc.). In the analysis which led to Table 17, it was discovered that 75.5 percent of the seniors

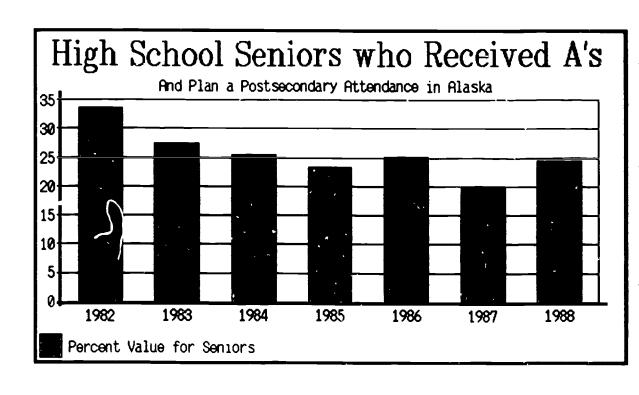

38

earning mostly A's in high school who planned postsecondary attendance, planned it for "outside" of Alaska. As illustrated in Figure 8, the proportion of seniors earning mostly A's who plan postsecondary attendance in-state has fluctuated considerably during the past seven years.

TABLE 17
PERCENTAGE DISTRIBUTION OF SENIORS BY

Mostly C's	38.1	61.9	100.0
Below C's	30.3	69.7	100.0

FIGURE 8

It is important to try to understand why those seniors earning mostly A's plan to attend postsecondary institutions outside of the state. Although a more detailed presentation is found later in this report, the survey contained a question which asked the seniors to indicate which factors were important in their decisions about institutions. Of those seniors who earned mostly A's and intended to enroll in an institution "outside" of Alaska, the most important reasons were Availability of Program, Reputation and Prestige of the School, and the desire to attend a college "outside." This finding parallels very closely the research regarding "brain drain" in other states.

When addressing the question of "brain drain" then, we find that a higher percentage of Alaska's higher-grade-earning seniors are indeed looking "outside" for their postsecondary schooling. This is, also, not unlike the experiences of other states.

Alaska Attendance. When asked which institution in Alaska they planned to attend, 46.7 percent of the responding seniors indicated the University of Alaska Anchorage, followed by the University of Alaska Fairbanks, with 27.6 percent. The responses to this question are presented in Table 18.

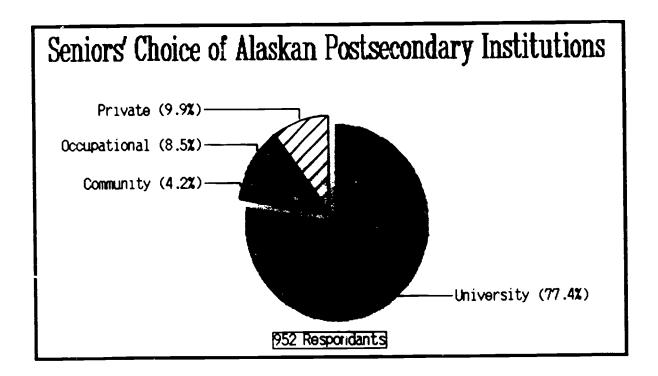

It should be pointed out that, although the independent college sector of the postsecondary education community in Alaska is call, almost 10 percent of high school seniors intends to enroll in one of the three institutions, as shown in Figure 9. Moreover, over 8 percent plan to attend occupational schools which are dedicated to preparing persons for employment in selected career fields.

Reasons for Institutional Choice. Why a senior chooses to attend a particular institution is a question of great interest to those persons involved in postsecondary education. The seniors were asked to indicate, from a list of 17 possible reasons, which factors were important in their decisions about institutions. The seniors were to pick the two most important reasons and also the least important reason affecting the choice of the postsecondary institution they planned to attend.

The most important reasons for institutional choice were Availability of Program, Low Tuition and iving Expenses. As illustrated in Table 19, Reputation or Prestige of School, Close to Home and simply wishing to Attend School "Outside" appear to be other important reasons why seniors choose to attend a particular institution.

TABLE 19 REASONS FOR SELECTING A POSTSECONDARY EDUCATIONAL INSTITUTION

To understand further the reasons why students attend in-state or out-of-state institutions, institutional choice was cross-referenced with the state of planned attendance, the results of which are presented in Table 20. Also, those factors affecting choice were further analyzed on an in-state basis. A cross-tabulation was run between reasons for institutional choice and an identified Alaskan institution. The results of those data for selected institutions are shown in Table 21.

For those seniors who intend to enroll in a postsecondary educational institution outside the State, the major reasons for institutional choice were Availability of Program, Reputation of School, and Geographic Location. For those students planning to attend institutions within the state, the principal factors affecting institutional selection were Low Tuition and Living Expenses and Closeness to Home.

TABLE 20 REASONS FOR SELECTING A POSTSECONDARY EDUCATIONAL INSTITUTION DISTRIBUTED BY STATE

STATE	PRIMARY REASON	SECONDARY REASON

Trade, Technical Schools	Low Tuition & Living Expenses	Close to Home

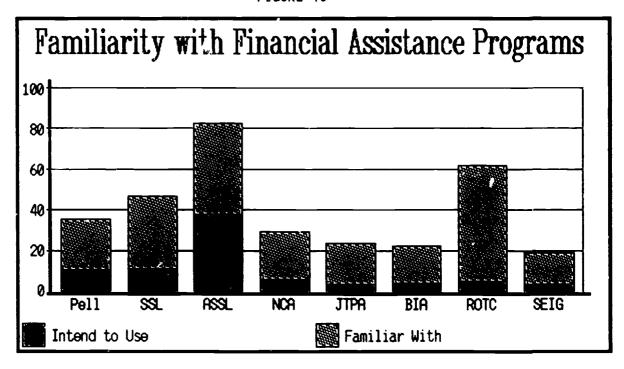

Familiarity with Financial Aid. The seniors were asked about their familiarity with, and intent to use, various types of financial aid available for postsecondary education. As noted in Table 22, the program with which the seniors were most familiar (when combining familiarity with intent to use) is the Alaska State Student Loan Program. Over 80 percent of the students responding to this survey are aware of the program, and more than 1 in 3 intend to use it. Figure 10 on the next page shows the cumulative familiarity with each financial assistance program.

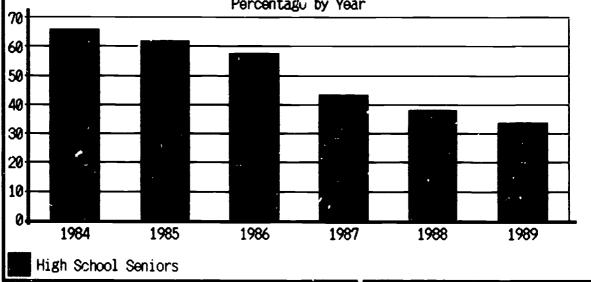

FIGURE 10

Plans to Return to Alaska. Those seniors planning postsecondary education out-of-state were asked if they planned to return to Alaska after completing their schooling. Figure 11 indicates that since 1984, a decreasing proportion of seniors plan to return.

Out-of-State Attendance Planning Return to Alaska Percentagu by Year

FIGURE 11

-36-

This year, the number of seniors indicating they would return is almost half that of 1983-84, 33.6 percent. The reason for such a decline is uncertain, but many students volunteered that the state's economy and job market outlook is perceived as poor. Another factor may also be that the forgiveness benefit was discontinued at this time. Moreover, although there has been a strong relationship between the distance one intends to go away from the state and the intention to return after schooling, that relationship is not as strong this year. A regional distribution is presented in Table 23 and Figure 12 which indicates that, in general, the propensity to return decreases when the student attends school in the Southern areas.

SUMMARY

Alaska's high school seniors have now responded to twelve consecutive annual surveys. Responses have been generally consistent over most of this period. Based upon historical responses, plus this survey, the following conclusions are drawn:

- 1. Most seniors are generally quite satisfied with their high school experiences. Consistent with past surveys, particular areas which have received the highest number of "outstanding" marks are Athletic and Recreational Facilities, Counseling and Guidance Services and Quality of Instruction.
- 2. Although seniors from small schools continue to be slightly less satisfied with their high school experience as seniors from large schools, in the percentage of outstanding responses from seniors from small schools concerning quality of instruction continues to be high for the fourth year in a row. Some reasons which have been suggested for this encouraging statistic are (1) the small schools, most of which have only been in existence for a few years, are maturing; (2) there has been an increased emphasis on curriculum development; and (3) more students are graduating than in previous years.
- 3. Seniors feel satisfied with their general knowledge and experience with computers but almost one in three expressed dissatisfaction with their educational experience in foreign languages.

- 4. Regardless of whether they plan to pursue further schooling, many seniors feel that they need assistance in improving mathematics skills and in developing career or educational plans. Those seniors planning to work directly after high school continue to express a strong need for career planning.
- 5. Seventy percent of the seniors intend to pursue postsecondary education. During the past several years, there has been a significant increase of seniors planning to attend a 4-year college or university.
- 6. Those seniors who have higher household incomes and who earn higher grades are more likely to plan schooling beyond high school than are other seniors.
- 7. Proportionately, considerably fewer seniors from small schools plan to attend a postsecondary institution than seniors from large schools.

 Also, a much larger percentage of seniors from small schools are undecided about what they plan to do after graduation than seniors from large schools.
- 8. The percentage of students who choose to remain in Alaska for post-secondary education has risen slightly after a previous four year decline. California, Washington, Oregon and Arizona are th most popular states for those seniors who intend to enroll in institutions out-of-state.

51

-40-

- 9. Although many students in all grade categories are drawn "outside," the tendency to plan out-of-state attendance is highest among those seniors who earned mostly A's in high school. Institutional Reputation, Availability of Programs and the desire to attend "outside" are the reasons that "A" students cite for choosing their schools. Other states have reported similar propensities among their seniors who exhibit high achievement.
- 10. Regardless of the grades they earned in high school, some seniors choose particular out-of-state educational institutions primarily because they want to attend school "outside." In general, students choose particular Alaskan institutions because of cost and proximity.
- 11. The University of Alaska's Anchorage and Fairbanks campuses continue to be the top choices for those students who remain in Alaska for further schooling; over 75 percent of in-state students indicated that they plan to attend one of these two institutions.
- 12. The percentage of seniors planning to attend school out-of-state and return to the state has been decreasing during the past five years, from 65 percent to 33.6 percent. In general, the propensity to return to the state upon completion of their education decreases when the student attends school in the Southern areas.

The information from this survey is compiled on an individual high school basis and returned to each participating school. This feedback enables the secondary school officials to better plan or respond to high school students' needs. The information and results are also used on a statewide basis for planning and analysis of postsecondary resources for Alaskans.

APPENDIX A 1988-89 ALASKA HIGH SCHOOL SENIOR SURVEY

1988-89 ALASKA HIGH SCHOOL SENIOR SURVEY

This survey is an attempt to find out what you intend to do with your life the first year after graduation. The results of this survey will be used to plan for the growth and development of postsecondary education.* In Alaska, to coordinate and plan for better financial aid services for Alaskan postsecondary students and to provide for the educational needs of Alaskan high school graduates.

Please answer questions 1 through 15 regardless of what you plan to do after graduation. Students continuing in postsecondary education; should also complete questions 16 through 20. Individual responses will be kept confidential. Your social security number is requested in item 15, this is *voluntary* information and will only be used as follow-up, not to identify the individual.

PL	EASE PLACE THE NUMBER OF YOUR RESPONSE IN THE SPACE PROVIDED AT THE RIG	ант.
1.	What is your sex? 1. Male 2 Female	SE
2.	How do you describe yourself? (Choose only one)	
3.	What category best describes your total family income? 1. Under \$15,000 2. Between \$15,000 and \$25,000 3. Between \$25,000 and \$40,000	
4.	What category best describes your parents' level of education? Father Mother 1. did not finish high school 2. graduated from high school or attained the GED 3. attended college 4. graduated from college with at least a bachelor's degree	or 4)
5.	There are a number of financial aid programs offered to Alaskans Please indicate your familiarity with each program by using the following code 1 I am not aware of this financial assistance program. 2. I am aware of this financial assistance program. 3. I am aware of this program and plan to use it. A. Pell Grant Program B. GSL (Guaranteed Student Loan Program) C.
